## STATISTICAL NOTES

### Background

The official collection of Aid for Trade data originated from a decision made by WTO members at the Joint WTO/OECD Trade Capacity Building meeting on 4 May 2007. It was decided to use the OECD-DAC Creditor Reporting System (CRS) for the collection and monitoring of the broader Aid for Trade agenda instead of the Trade Capacity Building Database (TCBDB) which catered for the more specialised reporting on trade related technical assistance and capacity building (TRTA/CB).

In this respect members of the OECD Working Party on Statistics agreed to modify the CRS to accommodate the collection of Aid for Trade data in 2007 by adding a trade-related adjustment code and a policy marker for trade development activities.

### Data

Aid for Trade data in Chapter 3 and Annex 1 are collected on an annual basis from DAC members, multilateral agencies and non-DAC countries. The information provided concerns Aid for Trade as part of Official Development Assistance (ODA) on a commitment and disbursement basis (see definitions below). All activities reported relate to countries on the DAC List of ODA Recipients (see Annexes 3 and 4).

The CRS covers all sectors of aid and so a specially adapted CRS questionnaire and reporting guidelines were created for collection purposes. A full list of Aid for Trade CRS purpose codes can be found in Annex 5.

Data used for this publication covers commitments from 2002 to 2009 and disbursements from 2006 to 2009. Both flows are in US dollars (deflated base: 2009). All commitment data are compared to a 2002-05 baseline which was established to measure the progress since the launch of the Aid for Trade Initiative at the 2005 Hong Kong WTO Ministerial Conference.

### Definitions

**Commitment:** A firm obligation expressed in writing and backed by the necessary funds, undertaken by an official donor to provide specified assistance to a recipient country or a multilateral organisation.

**Disbursement:** A disbursement is the placement of resources at the disposal of a recipient country or agency.

### Further Information

1. Caution should be used when interpreting Australia's Aid for Trade data. See Box 3.2 for further details.
2. For an explanation of the Inter-American Development Bank's data reported to the CRS, see Box 3.2.
3. Footnotes included in the tables to Annex 1 refer to specific issues.

- Trade development activities are identified in the CRS via the trade development policy marker which was introduced in 2007. The amounts shown represent an "of which" of building productive capacity activities that have been marked as contributing principally or significantly to trade development. Note however that these amounts can only at best be used as approximations.
